**Bathrooms:** 4

**Bedrooms:** 3

**Lot size:** 584

**Price:** 27790000

**Property size:** 319

**In a sought-after part of Cherng Talay, these Balinese and stylish Botanica Hillside pool villas have convenient, easy access to a large range of amenities, attractions and services.**

This project is being developed by one of Phuket's most successful villa developers. It will consist of 12 modern and Balinese blend style villas, on plot sizes ranging from 531 sqm up to 1026 sqm with either 3 or 4-bedroom floor plans.

Every villa is U shaped and feature awesome, open-plan living and dining areas, with a very well-equipped kitchen with a breakfast bar in the middle. The master bedrooms come with a larger ensuite bathroom with a separate bathtub and shower. Other guest bedrooms have shower fitted bathrooms.

The larger villa types will have a rooftop terrace with a tropical Balinese-style sala, which is ideal for family gatherings, parties or any kind of social entertainment.

New project by Botanica's expert team of top-tier architect and builders, the Hillside offers company's tried and true, popular Thai-Balinese villas in a convenient location.

Botanica Hillside is set on an almost 7-rai plot in Bangjo area. It's a serene place surrounded by tropical nature, yet it remains in a close proximity to Bang Tao beach, with its plethora of dining and shopping options, including Boat Avenue district and Porto de Phuket shopping mall, offering excellent balance of quiet island life and access.

The villas come in 2 types - 3- and 4-bedroom - each featuring spacious living room, open terrace, private swimming pool and sala. Land plots start from solid 471 sqm. All villas are built in Botanica's signature luxury tropical style. The developer since started branching into modern loft and updated tropical style with their new projects, but there is something to be said about the classics.
