Layan Verde project combines all the advantages of the most attractive project in Phuket: advantageous location, outstanding architecture, modern design, advanced technology and harmony with nature.

Layan Verde is a new complex in Phuket that combines grand architectural solutions, innovative technologies, and environmental stewardship.

The project is situated in a pristine area of Phuket, surrounded by palm and mangrove forests. Eco-friendly development technologies are employed here, including solar panels, roof and exterior wall insulation, rainwater collection and recycling tanks, and a unique water purification system for the pool, without the use of chemicals.

Layan Verde is an ideal place for permanent living or vacation. The complex comprises several buildings with apartments featuring spacious layouts, high ceilings, and ergonomic designs. The infrastructure provides a wide range of amenities, such as a fitness center, spa salon, restaurants, and shops.

Shopping Center: LAYAN VERDE is a unique project in Phuket that includes an on-site shopping center. This makes for an even more comfortable lifestyle, allowing you to save time with shopping just a short walk away.

Real estate investments in Phuket are becoming increasingly appealing: A stable economy, favorable legislation, simplified banking operations, rapid growth in tourist traffic, and increasing property values enable high capitalization upon subsequent sale or long-term passive rental

income.

Invest in Layan Verde now and capitalize on maximum returns
