The single level design offers more privacy than a two level house, and is easier to keep cool. The living/ dining rooms and master bedroom surround the pool and have large sliding doors to allow freedom of movement as well as air flow.

The villas are a practical size with large bedrooms and a really nice kitchen, but will not cost too much to maintain. The idea is to get the most out of the villa without leaving a giant carbon footprint.

Villa and Property Features:

Private 10 X 4 meter pool.

Large hardwood Thai Sala (included in price)

5 meter high, hardwood feature ceilings.

Built in air conditioning throughout.

Covered parking, with plenty of additional parking available on our private road.

Professionally landscaped with tropical palms and plants.
