12 exclusive luxury villas have been designed by one of Phuket's leading architect firms, Oracle Architects. The vision behind the project has been to create a unique tropical design inspired by the mythology of the Himmaphan forest.

The villas are designed in a modern tropical style with white cream colours and light wooden features to suit the tropical environment and climate in Phuket. The eco-energy design with the large windows and doors allows natural airflow throughout the building creating a natural way of cooling it down. The smooth transitions between the indoor area and outdoor area give a feeling of one large area and the sunken pool deck perfectly connects the indoor space with the waterfall, swimming pool and sun deck. Each of the bedrooms have en-suite bathrooms, large wardrobe and their own private terrace with access to the tropical garden.
