Punyisa - Luxury living by M2 Plus 4-5 Bedroom in Bang Jo

The principal design objective of Punyisa Villas is to create a home that is your sanctuary. To deliver this objective, Mary Pakamard created an integrated architectural and landscape concept embracing sustainable living.

Punyisa Villas is seen as a "synthesis of the arts"; in which we design not just the buildings and the interior spaces, but also the furniture, built in furnishings, the artwork and the accessories. All are extremely sensitively designed in scale with their surroundings, while the owner experience is one of complete privacy.

M2 Construction are a turnkey design & build company.

We're problem-solvers with focus. Project managers with purpose. Team players with one goal in mind: To deliver your project on time, on budget, and on vision. We achieve this success without ever compromising our values by providing quality construction practices, effective communication, and a deep understanding of the construction environment in Thailand.

Our long history in Phuket enables us to navigate complex regulations with ease and to anticipate issues before they become problems. This experience ensures that each project is completed seamlessly and responsibly. As a commercial construction company, we support Phuket island's businesses today and inspire what's yet to come tomorrow.

At M2 Construction, we help every client see their vision come to life.
