This luxury villa is a unique ultra modern contemporary design, which maximizes the exquisite natural features of the site from the magnificent ocean views to the west, the majestic granite rock formation that forms the north boundary of the villa site to the natural forest that covers the Kamala headland.

You enter the villa along steps, which lead through a sloping tropical garden before crossing the entrance pond into an expansive, open-plan living area. This tranquil design features 18m long glass doors that slide back to provide a natural flow from the entrance garden, through the living area, across the pool deck and on to the magnificent views of the Andaman Sea.

The level below the main living area consists of a large family room, with a 52inch TV, a table tennis table, a futball table and a small bar area as well as 2 further en-suite bedrooms also with sea views. The villa has been built into the rock face along the North boundary and the granite rock formation provides a unique and spectacular natural wall to the villa.
